Power Cords
Copper Products

Overview
Power cords are offered with a variety of connector types, colors, locking types, angles, and lengths.

Connectors types are standardized in International Electrotechnical Commission (IEC) or National Electrical Manufacturers Association (NEMA) types.

All North American cords are UL and C-UL approved with UL preferred 105°C jackets.

Features
- All cords have UL and C-UL approvals for use in North American markets and many other countries. Some cords also have SAA, CCC, or VDE approvals for use internationally.
- Varied lengths available, allowing clear space for airflow, maintaining an unobstructed exhaust port, and increasing the lifetime of equipment.
- Optional locking plugs create a secure connection that can be unlocked by pressing the related tabs.
- Optional Angled plugs reduce cable congestion and allow for a more efficient use of space.
- Available in a variety of colors for easy identification.
- RoHS Compatible.
